

EgertonNP Policy P2 - Local Green Spaces

Local Green Space, as defined on Maps xxxx, preserve the open green character of the parish, provide wildlife habitats, have local amenity value and will be protected from any future development unless they are ancillary to, and support, the use of the land for the purpose for which it was designated as Local Green Space.

A full green space assessment was undertaken by members of the Neighbourhood Plan Steering Group, and then re-assessed by the South Downs National Park Planning Team. Their findings are available to consult at the Green Spaces table.

The three green spaces for protection are:

The Glebe – principally for its recreational value to the local community

The greenspace of Elm Close and behind Rock Hill Road – principally for its recreational value to the local community

Lower recreation ground – principally for its recreational value to the community
